

What can we do to get information?

Group J

Methods of gathering information

- ❑ Ask scientists, that aren't being funded by the government.
- ❑ Scholar.google.com provides scientific information.
- ❑ Observe the environment yourself.
- ❑ Fact check information provided by any media source for its accuracy.

What will happen?

- ❑ We'll lose the trees and anything related to them, including animals, healing plants and jobs.
- ❑ We'll lose anything located near the coast, due to the sea level rising.
- ❑ We won't be able to breathe the air anymore, hence sicknesses related to our lungs will spread like wildfire.
- ❑ It's going to get very hot. Plastic products will melt in the open. There will be many fires.
- ❑ Agriculture will gradually come to a stop due to droughts and barren land, thus we can't feed our farm animals, nor the humans.
- ❑ Natural catastrophes will increase.
- ❑ We will lose a lot of products we're comfortable with, such as paper.
- ❑ We'll run out of fuel in the long run.
