

A large, white iceberg with a long, thin tail of ice trailing behind it, floating in a dark blue body of water. The iceberg's reflection is visible in the water. In the background, there are dark, rugged mountains under a blue sky with scattered white clouds.

How climate change affects  
our countries right now.

# Italy

How has Climate Change affected Italy?

- ❑ Extreme heat-waves
- ❑ Intense rain fall
- ❑ Floods across the country
- ❑ Landslides
- ❑ Rising sea levels

If current trends continue cultural treasures will be put at risk, the majority of wine-growing areas, olives production and wheat harvest would be lost, resorts will be nothing more than abandoned features.

# Sweden

How has it changed our country?

- ❑ Less snow during winter - icy
  - ❑ Reindeers
  - ❑ Less activities
- ❑ Changed vegetation zones
  - ❑ + more options for growing crops
  - ❑ - indigeoness species have to move north
- ❑ Extreme weather

# Germany

How the climate change infects Germany?

- Agriculture is harder
- less to no snow in the winter
- Automotive industry isn't/wasn't fast enough in changing their concept

vs

# Cyprus

- ❑ Less snow, now only in higher regions. Used to be in lower regions as well.
- ❑ Extreme heat in summer
