

The background of the image is a deep black space filled with numerous small, distant stars. On the left side, a portion of the Earth is visible, showing blue oceans, white clouds, and green landmasses. To the right of the Earth, a large, glowing celestial body, possibly a comet or a small planet, is depicted with a bright yellow and orange core and a long, diffuse tail of red and orange particles trailing towards the right. Overlaid on this scene is the text 'Impact the climate change has on our personal life' in a white, sans-serif font.

Impact the climate change  
has on our personal life

# Germany

What am I worried about?

- worried about the forest and that they probably will disappear
- sad about that we should travel less
- influenced by drier and warmer summers and winter

# Italy

How does Climate Change affect us?

- Melted water from Italy's Alpine glaciers contribute to rising sea levels.
- Extreme weather like this year's floods and landslides across the country.
- In central Italy the trend of annual mean temperatures showed an increase of  $0.060^{\circ}\text{C}/\text{year}$ .
- By the end of the century the Alps could be completely ice-free.

# Sweden

Why are we worried?

- Warmer
- Higher sea levels
- Forests

Consequences

- No snow
- Land put under water
- Economical consequences
