

# Changes due to global warming

# Italy

---

- Longer summers
- Extreme weather
- Higher sealevels

# Sweden

---

- The risk of wildfires
- Parasites kills the trees
- The climate in the north will be the same as in the south

# Cyprus

- Bad weather resulting into destruction of public properties
- We have longer summers resulting into drought
- Sealevels are rising

# Germany

---

- The farmers are suffering below the repercussions of droughts and barren land
- Plants are dying
- Hotter summers, little rain
- Barely any snow in winter
